Community Showcase / Workflow Show & Tell

Created	January 20, 2026 1:47 AM
Difficulty	Level 1
Date	Empty
Place	Empty

Format Type: Community Showcase / Workflow Show & Tell

Difficulty: Level 1–2 (Beginner to Intermediate)

Purpose

Highlight real Clay workflows, experiments, and wins from community members.

This format creates space for peers to learn from each other's **actual setups**, not theoretical examples, and helps surface local expertise.

Best For

- Trial events or early-stage communities
- Mixed audiences (new users + experienced operators)
- Cities looking to identify power users and future hosts
- 15–40 attendees

Structure

- Host welcome + framing (5 min)
- 3–6 short showcases (5–8 min each):
  - What problem they were solving
  - How they used Clay
  - One key learning
- Light audience Q&A after each share or at the end (15–20 min)
- Open networking or casual discussion (30–60 min)

Outputs

- A set of concrete workflows or ideas attendees can try immediately
- A short recap highlighting showcased use cases
- Identification of strong contributors for future events

Why It Works

- Low pressure for hosts and speakers
- High signal for attendees
- Encourages community contribution early
- Scales well from trial events to recurring series
