Referral payments & tracking not automated if customer pays outside of Stripe

Status	Consolidated
Issue Type	Payout
Next Resolution Date	@January 1, 2026
Priority	High
Solution	Evaluate Rewardful Managed Payout or PartnerStack

Context

Currently we have to process manual commission payments if payment occurs outside of Stripe. Increasingly happening for referrals to ENT customers, or Self-serve customers in more traditional industries

Examples:

- TopDesk(ENT)
- MuckRack (ENT)
- TRC Talent (Pro)
- Sutherland (Pro)

Solution

☐ Need to make decision on the Zapier workflow Emmet is referencing

Hey Emmet, we are increasingly bumping into this situation where customer payments are occurring outside of Stripe.

Can you please provide guidance on how we can get these automatically processed via Rewardful, so we don't have to do manual invoicing/payments each time?

Examples:

TopDesk

MuckRack

Hey Nancy,

Just to make sure I understand correctly what is happening - you are creating an invoice in Stripe for revenue recognition purposes, but then the payment happens via some offline means (e.g. a bank transfer), and then you mark that invoice as paid manually in the Stripe dashboard, correct?

If my understanding is correct I think we can set up a pretty simple workflow using Zapier or Make that will automate this for you. I've got my team doing a quick test to make sure this workflow works on our account, and I'll let you know shortly.

Best,

Hi Nancy,

I can confirm the Zapier workflow tests worked. It's very simple to set up. If this is a suitable workflow for you let me know. If you don't use Zapier I can likely recreate the workflow in other tools like Make if you prefer. Let me know your preference.

Regards,
